# REPORT

OF THE

## GENERAL COMMITTEE OF GOVERNORS

OF

### ST. LUKE'S HOSPITAL,

FOR THE YEAR 1860.

---

*To the Court of Governors of St. Luke's Hospital.*

Your Committee, in presenting to the Court their Report for the year 1860, have the great pleasure to announce, that the Income arising from Benefactions during the past year, reached no less a sum than £2,325. 15s. 3d., against £893. 16s. 3d. in 1859, thereby confirming an opinion they ventured to express in their last Report, viz.: that so soon as the Public were made acquainted with the usefulness of this valuable Institution, funds would be forthcoming towards its support.

The example so liberally set by the Worshipful Companies of Grocers and Clothworkers, in presenting Donations of £100. and £21., was, as your Committee had every reason to hope, followed by—

Fishmongers' Company	...	...	£ 50.
Goldsmiths' do....	...	...	£100.
Merchant Taylors' do....	...	...	£105.
Mercers' do....	...	...	£100.
And Cutlers' do....	...	...	£5.5s.

To all and each of whom your Committee desire now to offer their most grateful acknowledgments.

At the same time, they feel sure there are yet other Public Bodies prepared to assist in carrying out to the utmost, the benefits of this most needed Charity.

Your Committee are pleased to find, that the Hospital has not been forgotten by those friends who have been removed by death, and they take this opportunity of acknowledging the following Legacies :—

From the Executors of the late

Sarah Cullum ... .. £180.

Elizabeth Tindal ... .. £100.

also Baroness de Sternberg, complet-

ing her Legacy of £500., Free

of Duty ... .. £125.

Your Committee regret to record the loss of two Governors, Alderman Sir George Carroll, nominated in 1851, and their late colleague Charles Few, Esq., who was for more than ten years a very active and useful member of your Committee, and after his retirement, continued to take a warm interest in the amusements of the Patients.

Your Committee, however, have the satisfaction of stating, that during the past year, 24 New Governors were nominated, besides the Masters, for the time being, of the Worshipful Companies of Fishmongers, Grocers, Goldsmiths, Merchant Taylors, and Mercers, and three friends who completed the payment of their qualification as Governors.

Some few responses have been made to the appeal for Annual Subscribers; and among them one of Ten Guineas from an active member of the Committee, who specially directed his subscription to be expended in procuring amusement for the Patients, by the hire or purchase of suitable books.

Your Committee have also the pleasure to acknowledge a Grand Pianoforte from Mr. G. Peachey, also one from Messrs. Stodart and Son, besides sundry parcels of music from Messrs. Keith, Prowse, and Co., Cramer and Co., T. Purdy and Co., Duff and Hodgson, and a Bagatelle Board from their much respected Surgeon Mr. Luke.

Your Committee urge upon the Governors severally to interest themselves in obtaining new Governors and Subscribers, so as to make the Income of the Charity more adequate to the required expenditure.

Your Committee regret to state that although they have repeatedly made known by advertisements the extension of the

benefits of this Hospital, sanctioned by the last Annual Court, to Patients who have been afflicted more than Twelve Calendar Months, or who have been discharged from other Establishments, the Public have not yet sufficiently appreciated the advantages thus offered, only 18 such cases having been admitted during the year, and there have been only 13 Curable Cases received at 21s. per week under the Resolution of the Annual Court of 1858. Your Committee hope that there may soon be an increase in these numbers, the enquiries for the Forms of Application having recently been more frequent.

The amount of House Expenses in 1859 was £4,758. 0s. 2d.; in the past year, £4,896. 6s. 7d. The excess may be accounted for by the cost of an extra supply of Coals, and the improvement of the Wing Wards by covering the Floors with Kamptulicon.

Since the last Annual Court, the Commissioners in Lunacy have made their usual official visit to the Hospital, pursuant to Sec. 61 of the Act 8 and 9 Vic., c. 100. Their observations, dated 20th July, 1860, are recorded in the "Visitors' Book," kept for the purpose. And no complaint whatever is made as to the state of the Wards, or treatment of the Patients.

With respect to supplies for the past year, your Committee contracted from 1st April to 30th September last, for the best Wheaten Bread at 5½d. for a 4lb. loaf, and for Flour at 8s. per bushel; from 1st October to 31st December, 7¼d. Bread, 10s. 6d. Flour; 1st January to 31st March, 7d. Bread, 10s. 6d. Flour.

Your Committee also contracted for the usual kinds of Butcher's Meat, from 1st April to 30th September last, at 4s. 8d. per stone of 8 lbs.; and further, from the 1st October last to the 31st March next for the same, at 4s. 11d. per stone of 8lbs.

As regards the patients admitted to the benefits of this Charity, your Committee report that there have been received into the Hospital since the 31st December, 1859, and up to the 31st December, 1860, 143 patients deemed curable.

During the same period, there have been discharged cured 69, uncured 22; as unfit 10; at the request of their friends 9; and there have died 8. Since the 30th July, 1751, the day on which the Hospital was first opened for the reception of Patients, and up to the 31st December, 1860, inclusive, there have been ad-

mitted into the Hospital 19,722 patients, DEEMED CURABLE ON THEIR ADMISSION; of whom there have been discharged,

Cured ... ..	8,819
Uncured ... ..	6,730
As idiots, diseased or unfit... ..	1,900
By the desire of friends ... ..	573
From having (after admission) appeared to have been with child at the time of admission ...	62
Having proved to have been Insane more than twelve calendar months before the appli- cation to be admitted... ..	14
The friends not complying with the Rules of the Hospital ... ..	57
Having been found to be, in point of circum- stances, improper objects for this charity...	2
Having been found to have been previously discharged, uncured, from another Hospital for Lunatics ... ..	5
From not being lunatics ... ..	2
There have died in the Hospital since its first opening... ..	1,489
There remain on the books of the Hospital on the 31st December, 1860, deemed curable	69
<hr/>	
TOTAL ... ..	19,722
<hr/>	

Since the opening of the Hospital in 1751, and up to the 31st of December, 1860, there have been admitted 797 patients DEEMED INCURABLE, who had been previously discharged *uncured*, *exclusive* of those patients (nine in number) who have, from time to time, been re-admitted, by virtue of an Annuity Deed (dated 11th June, 1788) of the late Samuel Whitbread, Esq.; and since the 31st December, 1859, and up to the 31st December, 1860, 13 patients, *deemed incurable*, have been discharged at the request of friends; 1 upon trial; 2 cured, 1 being a pauper, 1 friends not complying with Rules; 3 died.

Of the said 797 patients (re-admitted as Boarders) *exclusive* of the Whitbread patients,—

122 have been discharged by the desire of friends.

43 have been discharged cured.

15 upon trial.

19 uncured.

10 by order of the Committee, being Paupers.

33 in consequence of the friends not complying with the Rules of the Hospital.

5 being deemed, in point of circumstances, improper objects for the Charity.

467 have died, and

83 were in the Hospital on the 31st December last, *exclusive* of Mr. Whitbread's patient.

---

Total 797

---

The average weekly number of Patients in the Hospital during the year has been 146.

The total number of Patients remaining on the books on the 31st December, 1860, was 153, namely, 69 Patients deemed curable, and 84 boarders, including Mr. Whitbread's Patient.

Your Committee recommend that the Right Honorable The Lord OVERSTONE be re-elected President of this Corporation.

That the Right Honorable the Earl of ABINGDON, the Right Honorable the Lord AVELAND; the Right Honorable the Viscount EVERSLEY; Sir EDMUND ANTROBUS, Baronet; JAMES BENTLEY, Esq.; and WILLIAM HENRY WHITBREAD, Esq., be re-elected Vice-Presidents of this Corporation.

That HENRY FRANCIS SHAW LEFEVRE, Esq. be re-elected Treasurer.

Your Committee have prepared a List of Governors, whom they submit to the Court as fit and proper persons to act as the General Committee for the year ensuing.

And finally, Your Committee recommend that the remaining Honorary Officers of this Corporation be severally re-elected, pursuant to the regulations.

All of which is nevertheless submitted.

REPORT  
OF THE  
PHYSICIAN AND MEDICAL SUPERINTENDENT,  
FOR THE YEAR 1860.

---

*To the President, Vice-Presidents, Treasurer, and Governors  
of St. Luke's Hospital.*

MY LORDS, LADIES, AND GENTLEMEN,

IN presenting our report for the past year, we do so with a feeling of confidence that it will contain particulars agreeable to be noticed by you.

We are happy to state that the Hospital has continued to maintain the high reputation it has held in former years with respect to the number and proportion of Patients cured. It will be satisfactory to the Governors to know that out of 97 Patients whose treatment has been completed during the last year, an average of 69.696 per cent. have been discharged cured.

The deaths during the twelve months have been 11; 4 of these being caused by organic disease of the heart, existing previous to admission.

We have the pleasure of stating that no Epidemic disease has prevailed in the Institution during the year.

The escape of one Patient has occurred, and this was effected by one of the males, who, previous to admission, had escaped from a Private Asylum. He went voluntarily to his friends, by whom he was detained.

Many of the cases have been in a very debilitated condition at the time of admission; this sometimes arising from nervous exhaustion, consequent upon previous excitement, and sometimes from bodily ailments, aggravated by want of good nutriment and necessary stimuli, and it may particularly be stated that such cases have progressed favorably under the treatment which is so liberally allowed in this Institution. As presumptive evidence of this favorable progress, we

find that the increase of weight out of 73 Patients whose average duration has been 14 weeks, 4 days in the Hospital, and who have been discharged cured, is 12 lbs. 6 oz.

We beg to thank you for the favorable consideration given to our recommendation to place Kamptulicon in the Wings of the Male galleries. This we feel confident will add much to the comfort of the Patients, and the good appearance of the Wards. We take this opportunity of suggesting that blinds should be fixed to all the large windows in the Wings, both on the Male and Female sides of the Hospital, for the purpose of keeping the Wards warmer and more comfortable.

We regret to learn that the steps taken to procure the waste piece of ground adjoining the Male Airing Court has been hitherto unsuccessful. We also regret that the intention of the Governors to devote the Central Airing Ground to the most quiet of the Female Patients has been frustrated by the annoyance resulting from persons inhabiting the adjoining houses which overlook the said ground.

The liberal donation recently given by one of the Committee of Governors, of 10 guineas yearly towards the purchase of Books, has proved most valuable. Half the sum this year has been spent in the purchase of standard works, which are eagerly demanded by the Patients; and the other half has been devoted as an annual subscription towards the circulating library of Messrs. Smith and Sons, for which 30 volumes weekly are secured to the use of the Patients. The management of this arrangement has been undertaken by Mrs. Walker. The number of books belonging to the Hospital is at present 80 on the Male, and 120 on the Female side. A general catalogue of these is kept in each Ward: by this means Patients can avail themselves of books out of other Wards as well as their own. We would express a hope that this number will be speedily increased.

The Patients have been encouraged to engage themselves in the different employments existing in the Hospital with considerable success; the average number employed during the day being, males 80, and females 73 per cent. They have also had free access to the different amusements provided by the Institution, of which they have fully availed themselves. The fortnightly Balls have been carried on with considerable advantage during the winter months. We may mention here that we should be glad to see a Bagatelle Board placed in each of the Female galleries, so as to afford increased means for evening recreation, this being the time when your Medical Super-

intendent has found that Patients of a melancholic temperament exhibit more particularly the unhappy and apathetic state of mind characteristic of that form of mental disease. Some much lighter and less expensive than those on the Male side would be suitable.

Large numbers of Patients have availed themselves of your permission to walk beyond the Hospital boundaries, and with very great benefit to their mental and physical health.

We hear with much pleasure that gratuities have been granted to each of those Attendants who have remained some years in the Institution. We feel ourselves justified in speaking highly of the Attendants generally. This is the more important, as there must necessarily exist at all times considerable anxiety in the minds of the Medical Officers whether or not due attention be paid to the instructions given for carrying out the medical, dietetic, and hygienic treatment which they prescribe ; and in this respect we are happy to believe that for the most part our wishes have been carried into effect. The sound policy of renewing this act of liberality from time to time, with a view to the maintenance and encouragement of zeal and duty in this part of your service, we hope will be continued as occasion may arise.

We are happy to know that publicity has been given by advertisement to your present arrangements, as we feel confident that good results are likely to follow the circumstance of the Hospital being thus brought under the notice of the public at large, and of medical men in particular, both in the Metropolis and in the Provinces.

In conclusion, allow us to offer our sincere and warmest thanks for the consideration and courtesy we have always received at your hands, and to express our hope that the use of means afforded us for the relief and comfort of the impaired and distressed minds of our Patients will continue to be attended with success.

We have the honour to be,

My LORDS, LADIES, and GENTLEMEN,

Your very faithful Servants,

HENRY MONRO, M.B., *Oxon.*

EBENEZER TOLLER, M.R.C.S., &c.,

*Res. Med. Sup.*

## STATISTICAL TABLES

Name.	Age.	Sex and Domestic Condition	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post Mortem Examination.	General External Appearance.	Scalp.	Cranium.	Weight and specific gravity of Brain.	C E R E B R A L .		Thorax.	Abdomen.
											Membranes.	Substance.			
M. R.	70	Female. — Single.	Mania, with Epilepsy.	Forty Years.	Disease of Heart.	Syncope.	1st May, 1860.	Body very thin; rigor mortis very marked; great distortion since death.	very adherent.	Calvarium thick, much diploe.	40 ozs. sp. gvty. 1.045.	Dura Mater very dense, almost ossific, firmly adherent to inner table of Calvarium. Arachnoid healthy; some amount of sub-arachnoid fluid. Pia Mater very slightly injected.	Firm. Grey matter pallid—median band scarcely any where visible; few bleeding puncta on section of white matter. Each ventricle contained about 2 drams of serum. Choroid plexus a mass of cysts. The arteries at base of brain all ossified, especially the Basilar and posterior cerebral.	Heart atrophied, texture very friable. Coronary arteries much ossified, and considerable atheromatous deposit on commencement of Aorta. Lungs healthy, but congested. Some old pleuritic adhesions.	Liver very friable, easily penetrated by index finger. Gall bladder contained some thin yellowish biliary matter. Spleen pul-taceous. Kidneys very soft and large. Capsule not separable from cortical substance. Stomach and bowels apparently healthy.
L. R.	58	Female. — Single.	Melancholia.	Six Months.	Disease of Heart.	Syncope	13th May, 1860.	Body exceedingly emaciated. The skeleton generally being merely covered by a thin skin.	Hardly separable from Cranium, owing to its extreme tenacity.	Calvarium very thin and dense in structure, no diploe.	43½ ozs. sp. gvty. 1.060.	Dura Mater healthy. Arachnoid slightly opalescent in places. Pia Mater congested.	Healthy to all appearance. Septum lucidum entirely broken down. Ventricles contained a little serum. Choroid plexus full of cysts. Grey matter natural. Considerable number of bleeding puncta on section of white substance.	Cartilages of ribs cut like cheese. Heart very small; right side very thin. Tricuspid valves almost useless. Left ventricle hypertrophied at expense of cavity, the latter hardly to be penetrated by the tip of finger; not dilatable. Aorta very much dilated, half as large again as natural for 3 inches in extent from its commencement. Pulmonary artery very large. Lungs rather emphysematous, slightly congested.	Liver greasy and pale. Gall bladder contained a little yellowish fluid. Stomach healthy. Bowels much congested in patches. Kidneys softened. Spleen healthy.

# TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex and Domestic Condition	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections	Mode of Death.	Date of Post Mortem Examination.	General External Appearance.	Scalp.	Cranium.	Weight and specific gravity of Brain.	C E R E B R A L.		Thorax.	Abdomen.
												Membranes.	Substance.		
M. H.	65	Female. — Widow.	Melan- cholia.	One Year.	Disease of Heart.	Syncope.	1st July, 1860.	Body much emaciated, and bruised on arms and legs.		Calvarium very thick, much diploe.	39 ozs.	Dura Mater very adherent. Arach- noid opalescent in places. Pia Mater much congested.	Firm. Grey mat- ter dark; no medi- an band visible. Many and large bleeding puncta on section.	Walls of Heart very thin; right ventricle dilated; left very small, les- ened by concentric hypertrophy. Lungs healthy.	Stomach and bowels healthy. Kidneys large, soft- ened. Capsule se- parated with diffi- culty from cortex. Liver unctuous, soft, friable. Gall blad- der full of yellow- ish biliary matter.
J. D.	34	Male. — Married.	Melan- cholia.	Four- teen Weeks.	Disease of Heart.	Syncope.	23rd July, 1860.	Body ema- ciated. Chest and abdomen covered with pete- chial spots. Right leg and left foot swollen and oedematous.	Strongly adherent.	Calvarium but slightly connected to Dura Mata, much diploe.	49 ozs. sp. gvyty. 1.070.	Dura Mater very dense, almost horny. Arachnoid healthy; small quantity of sub- arachnoidcan fluid. Pia Mater almost bloodless.	Very pale; exsan- guineous; no bleed- ing puncta on sec- tion. Median band distinct generally. Grey matter pallid; about 2 drams of fluid in each lateral ventricle.	Heart greatly hypertrophied ex- centrically. Peri- cardium distended with serous fluid, no appearance of in- flammation. Pleurae distended with se- rous fluid, no de- posit of lymph.	Stomach full of semi-fluid blood, exhalation more es- pecially from cardi- ac extremity. Mu- cous membrane soft, not ulcerated. Bowels full of blood in various states of alteration. Liver pale, somewhat greasy, though tol- erably firm. Kid- neys small.

Name.	Age.	Sex and Domestic Condition	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post Mortem Examination.	General External Appearance.	Scalp.	Cranium.	Weight and specific gravity of Brain.	C E R E B R A L.		Thorax.	Abdomen.
												Membranes.	Substance.		
C. T.	49	Female. — Married.	Mania.	Six Weeks.	Gangrene of the Lung.	Asthenia.	26th Sept., 1860.	Body much emaciated, much rigor mortis.	Easily separable.	Calvarium symmetrical, thin, semi-transparent in places.	48½ ozs. sp. gvt'y. 1.032.	Internal surface of Dura Mater congested in patches. Arachnoid opalescent, and its surfaces adherent in places.	Anemic. Hardly any bleeding puncta on section. Grey matter very pallid. Lateral ventricles contained a small quantity of fluid. Choroid plexus very pale; contained a number of cysts.	Heart small, pale, flabby and fat; contained several fibrinous deposits. Lungs, left, crepitant, but very condensed. Right being adherent to pleura costalis, gangrenous, the whole interior readily breaking down under the finger. A cavity, which would contain an orange, had formed in the lower portion, and was filled with broken lung tissue and pus.	Liver large, fatty. Gall bladder contained several irregularly shaped gall stones, the size of horse beans. Uterus enlarged, and contained two small fibrous tumours apparently of recent growth. Other viscera healthy.
